Southampton	23.30	21	653	19	355	11	18	
Average per authority	35.04		521		361			
B - Residual household waste per household [ie waste not sent for re-use, recycling or composting] kg								
C - Collected household waste per person per kg								
Note: National overall rate for recycling in England in 2013 was 44.2%								
The ratings in coloumns B and C assume that less waste is recycled and more waste is generated								
which are bad things, reflecting on personal & household behaviour.								
Rating A could be said to reflect the manner in which a local authority manages household waste.
